

SMI200 grinding screen with frame and fire retardant curtain

🔗 Sectors [Grinding](#),

🔗 Applications: [Fix](#)

🔗 Issues [Light](#)

COD: SCH200X200IGNIF

The **grinding area protection screen** is the ideal solution for flexibly separating work areas and creating new, easily and quickly accessible grinding stations, protecting the environment from splinters and sparks.

The screen is shipped disassembled, as a kit with everything needed to assemble the screen in just a few minutes.

Detailed description

- **Removable** steel tubeframe with fixed support feet
- **Cloth made of Thermo-E-Glas-Filament fabric** with a special flame-retardant PU coating, grey on both sides, with aluminium pigments for increased anti-slip properties and fraying resistance

The maximum application temperature is 550 °C.

The screen is recommended for vertical use, e.g. as a welding and grinding curtain in situations where high temperatures are reached, or as a welding blanket for lower temperatures.

Dimensions

Code	Dimensions cm
