

SCS200 welding screen with frame and curtain

📌 Sectors [Welding](#),

📌 Applications: [Fix](#)

📌 Issues [Light](#)

COD: SCH200X200TEN00

The Secure Air **protective screen** is ideal for flexibly separating work areas and creating new welding stations that can be accessed easily and quickly.

Screens are supplied in kits with everything needed for mounting the stretched sheet.

Detailed description

During welding these screens offer maximum protection from blue light, ultraviolet radiation and arc light.

- **Removable** steel tube **frame** with fixed support feet
- **Thermo-E-Glas-Filament fabric cloth** equipped with a special flame-retardant PU coating, gray on both sides, with aluminum pigments to increase non-slip properties and resistance to fraying

The maximum application temperature is 550°C.

The shield is recommended for vertical use, such as as a welding and grinding curtain in situations where high temperatures are reached, or as a welding blanket for less high temperatures.
