

Anti-sparking front wall for SBC benches

📌 Sectors

📌 Applications: **Fix**

📌 Issues **Fumes**

COD: PARSB0000000000

Anti-rebound front wall for SBC benches, consisting of a suction metal mesh net placed on the front of the bench for operator protection from splinters and sparks from high-speed grinding.

Detailed description

Suction front panel of adequate thickness in anti-rebound wire mesh to stop sparks and any grinding chips from bouncing off the operator.

Easily removable for maintenance and cleaning.

Compatible with all SBC series benches

The **SBC suction bench** is available in 4 different sizes ranging from 1 to 3 meters. Designed to suck fumes and dust during professional operations that produce emissions dangerous for operators and the working environment as very volatile. This version is suitable for intensive use thanks to **cartridge filters with compressed air cleaning**, which ensure the restoration of maximum filtration efficiency at the end of the cycle and a long life in times.
